

5.2 Additional License Terms for Replacement Software

The Community Connect user agrees to accept the upgraded functionality that will be made available to them as a result of the parent organization executing their upgrade plan (bi-annually eventually moving to quarterly). Community Connect user base will be given prior notification of changes in the form of training tips, in-service, tip sheets, and classroom training where appropriate. The delivery mechanism will be established by the training organization within Scripps Health and fitted to the Community Connect User base by way of the account managers assigned to each of the Community Connect users.
