**Scripps ACO MSSP Final Results: Performance Year 2021**

The Scripps ACO's MSSP Final Reconciliation of Performance Year 2021 was released by CMS in August 2022. **Scripps ACO did not earn shared savings due to savings being within the 2% risk corridor.**

While additional analysis on cost and utilization trends is underway, below is a snapshot of our PY2021 results:

**PY 2021 SCRIPPS ACO MSSP RESULTS AT A GLANCE****41,129** attributed beneficiaries**\$6.8M** raw savings produced for CMS**1.4%** reduction in expenditures compared to benchmark**\$0** savings shared with Scripps ACO MSSP by CMS**Key takeaways:**

- Savings Rate of 1.4% (2% threshold for Shared Savings). Gap of 0.6%.
- Total Savings of \$6.8M (\$9.7M threshold for Shared Savings). Gap of \$2.9M.
- Scripps performed slightly better than earlier predictions with a .2% or \$800K variance to actual. This suggests more accuracy in our projection methodology.
- Our risk ratio, which is the measure of an occurrence in one group compared with the same occurrence happening in another group, was 0.991 - 1% lower than benchmark. If we had achieved 1.000 risk ratio, we would have earned approximately \$8M in shared savings.

**Key performance drivers include:**

- Quality performance of 89.75% (meets threshold for maximum payout at 75%)
- We continue to see lower than benchmark risk scores. Risk Ratio (Performance Year/Benchmark Year Risk Score) of .991.

We thank you for your participation in the Scripps ACO and MSSP and, with your partnership, look forward to continuing to deliver value-based, high-quality patient care. As we enter our sixth year in the MSSP, we encourage your ongoing engagement as it will increase our opportunity for shared savings for our ACO and its participants in the future.

If you have any questions, please contact your region's practice outreach manager.
